

Low Temperature Hydrogen Peroxide & Plasma sterilizer **Matachana 130HPO® & 50HPO®**

MATACHANA, specialists in low temperature

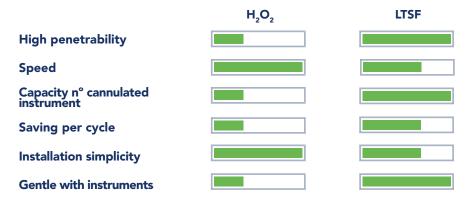

At MATACHANA GROUP, low temperature sterilization technology has a long history, parallel to the development of steam sterilization processes. Ethylene oxide and peracetic acid solutions were the forerunners in 1975. Then, Low Temperature Steam and Formaldehyde (LTSF) sterilization was the continuation of this process.

In 2016 MATACHANA launched its first hydrogen peroxide sterilizer, 130HPO® model

and in 2019, the HPO Series is extended with the compact 50HPO® model. In the same year we revolutionized LTSF technology with a new High Speed version.

In this way MATACHANA completes its range of low temperature sterilizers and consolidates its know-how and experience in this field, being the only manufacturer that has designed and manufactured all the existing systems in the market.

Comparing technologies:

130HPO[®] & 50HPO[®]: Safety, autonomy and user-friendly

SAFETY

The safety of patients, users and hospital staff has always been an essential requirement during the development of MATACHANA sterilization systems. The HPO Series is a clear example.

AUTONOMY

Objective: maximize the number of cycles, reduce the handling of the sterilizing agent (hydrogen peroxide), as well as extend its useful life.

USER-FRIENDLY

We have focused our task on the implementation of a user-oriented interface, as well as a simple and intuitive backlit front panel.

Two models to meet the needs of centers of all scales:

130HPO®: its 148-litre chamber, three differentiated cycles and speed make it the optimum solution for centers with a high work volume.

50HPO®: its 52-litre chamber, compact dimensions and mobile table mounting, combined with its minimal electrical requirements make it the perfect Plug & Play solution for smaller centers or as support equipment for large-scale centers.

Low Temperature Hydrogen Peroxide & Plasma sterilizer Matachana 130HPO® & 50HPO®

BluKat® the sterilizing solution container

BluKat[®] is presented in high-density polyethylene (HDPE) containers with great impact resistance.

- Innovative anti-spill and antidrip design for safe handling.
- With RFID tag to ensure the traceability of the sterilizing solution and a shelf life control.

Status light located on the front panel that provides instant information on the autonomy of the sterilizing solution:

- A single BluKat[®] container allows up to 30 cycles in the 50HPO[®] model and 18 cycles in the 130HPO[®].
- **30 days** expiry date inside the device, thanks to the **refrigerated compartment** that extends the life of the sterilizing solution, saving time and reducing handling.

18 months expiry date!

With just one click you have access to extended **BluKat®** information: batch number and expiration date of the container, number of cycles and remaining validity days.

eee matachana

The sterilizer is equipped with an automatic opening drawer, located on the front panel, easily accessible for placing the **BluKat**[®]. The design of the container guarantees its correct positioning inside the drawer, avoiding manipulation errors.

Secure load release

As safety is first and foremost, the Chemical and Biological Indicators have been carefully studied to ensure a secure load release, always in compliance with the International Standards ISO11140-1 and ISO11138-1.

A wide spectrum of advantages

000

to cover all your needs

DESIGN

 Modern and minimalist design to facilitate the cleaning process.

USER-FRIENDLY

- EasyRUN intuitive user interface.
- Status of the unit visible from a distance, thanks to the backlit front panel.
- Easy and quick learning by users.

ERGONOMICS

 Extendable and removable shelves for ease and flexibility during the loading process.

PLUG & PLAY (50HPO®)

 Plug & Play mobility thanks to the integrated mobile support table. Minimum power and electrical requirements.

CONNECTIVITY & DOCUMENTATION

- Integrated thermal printer.
- High-capacity internal memory with track record of the last 1000 cycles.
- USB port for backing up the cycle track record.
- Ethernet port for connection to monitoring and traceability software.

SOLUTION SHELF LIFE

000 matachana

HPO

- BluKat[®] has the longest expiry date in the market reaching 18 months!
- Properties of the sterilizing solution, guaranteed **30 days** inside the device thanks to the exclusive integrated refrigerating system.

BluKat® AUTONOMY

- Up to 30 cycles with one container in the 50HPO[®] model.
- Up to **18 cycles** with one container in the 13HPO[®] model.

EFFICIENCY

HPO

eee matachana

- Minimized cycle cancellation due to the functions below:
 - **Conditioning** of the load with elimination of residual humidity.
 - Self-diagnosis with confirmation of the load condition suitability and consequent saving of sterilizing solution, in case of cycle cancellation.

Technical specifications **HPO Series**

Technical specifications	50HPO [®]	130HPO®-1 1 door	130HPO®-2 2 doors	
Overall dimensions (mm)				
Width	780	900	900	
Height	1733	1864	1864	
Depth	796	1099	1120	
Usable chamber dimensions (mm)				
Width	302	335	335	
Height	236	363	363	
Depth	640	929	972	
Chamber volume (liters)	52	143	148	
Weight (kg)	*300	450	500	
Power (kW)	2.2	6.	6.5	
Power supply	230 V~ + PE /50-60 Hz	400 V 3~ N PE /50-60 Hz

Innovation is the way forward

Since the company's foundation more than 50 years ago, our mission has been to provide the best service, bringing our knowledge and field experience to our customers to facilitate their daily work, allowing them to be efficient in the production whereas keeping rigorously the quality.

MATACHANA has a worldwide presence, with offices based in Spain, France, Germany, Italy, United States, Argentina and Malaysia, or through its distributors in over 110 countries.

In MATACHANA we are aware that Training and Service contribute decisively to achieve customer satisfaction. For this reason, we have always invested in the development of these two areas of activity, which enables a direct contact with customers and help us to develop together a continuous improvement process.

Technical Engineering Support

An assistance provided by engineers, highly skilled expert technicians and support staff, all committed to ensure the proper equipment operation and condition.

MIEC, training center

As we feel seriously committed and liable for achieving the optimum operation from the MATACHANA equipment, we invest in the training of future users, proposing a service of educational courses to all our customers on a regular basis and in the 5 continents.

Environmentally friendly

The devices are designed and manufactured using the latest technologies on the market to achieve the best results in terms of energy savings and reduction in water consumption. Our Production Center located in Castelldefels (Barcelona) complies with the ISO 14001 Environmental Management System and ISO 50001 Energy Management.

Quality

The MATACHANA devices are developed, manufactured and tested within a strict quality control according to the international Standards ISO 9001 and EN ISO 13485 for the quality management of medical devices.
